## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-7 and 10-16, drawn to compositions comprising more than 25% of pentafluoroethane and methods of using same, classified in class 252, subclass 67.
  - II. Claims 8, 9, 17 and 18, drawn to compositions comprising less than 25% of pentafluoroethane and methods of using same, classified in class 252, subclass 67.

The inventions are distinct, each from the other because of the following reasons: The compositions are capable of supporting separate patents. A disclosure of one of the inventions would not anticipate or make obvious the other invention.

- 2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 3. If Group I is elected, further restriction to one of the following inventions is required under 35 U.S.C. 121:
- 4. A. Compositions comprising propylene.
- 5. B Compositions comprising propane.
- 6. C. Compositions comprising both propylene and propane.

The inventions are separate and distinct for the reasons given above.

Application/Control Number: 10/603,638

Art Unit: 1751

7. Because the restriction requirement is relatively complex, no telephone restriction was attempted.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner, Dr. John R. Hardee, whose telephone number is (571) 272-1318. The examiner can normally be reached on Monday through Friday from 8:00 until 4:30. In the event that the examiner is not available, his supervisor, Dr. Yogendra Gupta, may be reached at (571) 272-1316.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.

Application/Control Number: 10/603,638

Art Unit: 1751
